THE AMPS YOU DESIGNED

LEAD AND BASS GUITAR COMBOS
AND EXTENSION CABINETS

<p>SB:100-410 BASS COMBO</p> 	<p>Twin high and low sensitivity high impedance inputs. Pre-gain control. Compressor with depth control. Compressor IN/OUT switch. Volume control. Colour selector for traditional or modern voicings. 9 band graphic EQ circuit spaced at one octave intervals over the range of 40 Hz to 10 KHz \pm 15dB. Illuminated power ON/OFF switch. Auxiliary line input (0dB). D.I. output – pre EQ. Effects send and return jacks. Monitor output – line level with variable control. Headphone output. Extension speaker output. Maximum power 75 watts into internal speakers; 100 watts with extension 8 ohm cabinet. 4 x 10" (25cm) custom design long throw cone bass speakers with extended high frequency response. Size 585 x 585 x 320mm. Weight 35kg. Transit cover included.</p>
<p>SB:100-115 BASS COMBO</p> 	<p>Electronics identical to above but fitted with 1 x 15" (38cm) speaker in a tuned cabinet matched to the speaker. Size 585 x 585 x 320mm. Weight 34kg. Transit cover included.</p>
<p>SB:100-112 BASS COMBO</p> 	<p>Electronics identical to above but fitted with 1 x 12" (30cm) speaker in a tuned cabinet matched to the speaker. Size 470 x 470 x 320mm. Weight 26kg. Transit cover included.</p>
<p>SG:75-210 LEAD COMBO</p> 	<p>Single high impedance input. Dual footswitchable overdrive and clean channels. Variable overdrive harmonic filter. Super sensitive FET pre-amp design. Accutronics reverb unit. Three band 'valve type' EQ circuit. Monitor output with level control. Effects send and return jacks. Headphone jack. Maximum output 65 watts into internal speaker – 90 watts with extension 8 ohm cabinet. 2 x 10" (25cm) speakers. Size 585 x 375 x 250mm. Weight 22kg. Transit cover and footswitch included.</p>
<p>SG:75-112 LEAD COMBO</p> 	<p>Electronics identical to above but fitted with 1 x 12" (30cm) speaker. Size 435 x 375 x 250mm. Weight 16kg. Transit cover and footswitch included.</p>
<p>GC:85-112 LEAD CABINET</p> 	<p>Extension cabinet containing 1 x 12" (30cm) lead guitar speaker as fitted to SG:75-112 combo. Cabinet ported and response tailored for lead guitar only. Maximum input power: 85 watts. Nominal impedance: 8 ohms. Size 470 x 470 x 320mm. Weight 20kg. Transit cover included.</p>
<p>BC:85-112 BASS CABINET</p> 	<p>Extension cabinet containing 1 x 12" (30cm) bass guitar (cambric edge) speaker as fitted to SB:100-112 combo. Cabinet ported and tuned to match speaker. Response suited to bass guitar or low frequency small PA applications. Not recommended for lead guitar. Maximum input power: 85 watts. Nominal impedance 8 ohms. Size 470 x 470 x 320mm. Weight 20kg. Transit cover included.</p>
<p>GC:100-212 LEAD CABINET</p> 	<p>Extension cabinet containing 2 x 12" (30cm) lead guitar speakers. May be used for either lead or bass guitar if extreme low frequency response not required. Maximum input power: 100 watts. Nominal impedance 8 ohms. Size 585 x 585 x 320mm. Weight 27kg. Transit cover included.</p>
<p>BC:100-410 BASS CABINET</p> 	<p>Extension cabinet containing 4 x 10" (25cm) specially designed long throw bass speakers with extended high frequency response as fitted to SB:100-410 combo. Best used for modern 'slap' bass styles. Also suitable for very bright lead guitar sounds. Maximum input power: 100 watts. Nominal impedance 8 ohms. Size: 585 x 585 x 320mm. Weight 27kg. Transit cover included.</p>
<p>BC:100-115 BASS CABINET</p> 	<p>Extension cabinet containing 1 x 15" (38cm) bass (cambric edge) speaker as fitted to SB:100-115 combo. Can be used with lead guitar to produce a rich full low frequency response. Maximum input power: 100 watts. Nominal impedance 8 ohms. Size 585 x 585 x 320mm. Weight 26kg. Transit cover included.</p>

All Sessionettes are fitted with low hum radiation toroidal transformers. Output powers quoted are R.M.S. at rated A.C. supply voltage measured across a pure resistive load. Beige finish vinyl covering available at extra cost.
